Amendment, filed 7/19/07, has been entered.

Drawings

1. The drawings were received on 7/17/07. These drawings are approved.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bobby D. Slaton on 7/26/07.

The application has been amended as follows:

Claims of the application have been amended per Attachment A.

Note. Claims have been amended to resolve the numbering problem with the claims and to avoid reading on Hanson,

Allowable Subject Matter

3. Claims 1, 4-11 and 33-35 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dmitry Levitan whose telephone number is (571) 272-3093. The examiner can normally be reached on 8:30 to 4:30.

Application/Control Number: 10/634,591

Attachment A.

Amendment to the Claims

In a wireless local area network ("WLAN") which includes 1 (Currently Amended). a Layer-2 entity, a method for assigning an internet protocol ("IP") address to a mobile terminal upon entering a basic service area ("BSA") served by said Layer-2 entity, comprising:

said Layer-2 entity determining, on behalf of said mobile terminal, whether said mobile terminal should continue using a current IP address or begin using a new IP address; and

if said Layer-2 entity determines that said mobile terminal should continue using said current IP address, said Layer-2 entity issuing an instruction, to said mobile terminal, to continue using said current IP address; and

said mobile terminal issuing a Layer-2 service request to said Layer-2 entity upon entering said BSA:

said Layer-2 entity determining whether said mobile terminal should continue using said current IP address or begin using a new IP address from said Layer-2 entity. wherein said Layer-2 service request is formatted to include a current IP address field.

2 (Canceled).

3 (Canceled).

The method of claim 1 [[3]], wherein said Layer-2 service 4 (Currently Amended). request is formatted to include a mobile IP bit.

Page 5

5 (Currently Amended). The method of claim $\underline{1}$ [[2]], and further comprising:

said Layer-2 entity issuing, to said mobile terminal, a response to said Layer-2 service request; and wherein:

if said Layer-2 entity determined that said mobile terminal must continue using said current IP address, said response to said Layer-2 service request shall contain an indication that said mobile terminal must continue using said current IP address; and

if said Layer-2 entity determined that said mobile terminal must begin using said new IP address, said response to said Layer-2 service request shall contain said new IP address.

6 (Original). The method of claim 5, wherein said response to said Layer-2 service request is formatted to include a current IP address field.

7 (Original). The method of claim 6, and further comprising:

if said Layer-2 entity determines that said mobile terminal must continue using said current IP address, said Layer-2 entity placing a NULL in said current IP address field of said response to said Layer-2 service request.

8 (Original). The method of claim 6, wherein said WLAN further includes a Layer-3 entity and further comprising:

if said Layer-2 entity determined that said mobile terminal must begin using said new IP address, said Layer-2 entity issuing a request, to said Layer-3 entity, for said new IP address; and

upon receiving said new IP address, said Layer-2 entity placing said new IP address in said current IP address field of said response to said Layer-2 service request.

Page 6

9 (Original). The method of claim 8, wherein said Layer-2 entity receives said new IP address from said Layer-3 entity.

10 (Original). The method of claim 8, wherein said Layer-2 service request is an association request message and said response to said Layer-2 service request is an association response message.

11 (Original). The method of claim 8, wherein said Layer-2 service request is a reassociation request message and said response to said Layer-2 service request is a reassociation response message.

12 - 32 (Canceled).

33 (New). A wireless local area network ("WLAN") system providing wireless communication for a mobile terminal, comprising:

a Layer-2 entity;

a basic service area ("BSA") served by said Layer-2 entity, said mobile terminal issuing a service request receivable at said Layer-2 entity upon entering said BSA for determining an internet protocol ("IP") address assignment, wherein said access service request is formatted to include a currently assigned IP address field;

said Layer-2 entity determining whether said mobile terminal should continue using a currently assigned IP address or begin using a new IP address issued through said Layer-2 entity.

Page 7

34

New). The system of claim 32, wherein if said Layer-2 entity determines that said mobile terminal should continue using said currently assigned IP address, said Layer-2 entity issuing an instruction, to said mobile terminal, to continue using said current IP address.

(New). The system of claim 32, wherein said Layer-2 entity further for issuing, to said mobile terminal, a response to said service request; and wherein:

if said Layer-2 entity determines that said mobile terminal must continue using said current IP address, said response to said service request shall contain an indication that said mobile terminal is to continue using said currently assigned IP address; and

if said access entity determines that said mobile terminal should begin using said new IP address, said response to said service request shall contain said new IP address.
